MAR: SAIC Motor and JSW Group finalises JV; the Indian conglomerate picks up 35% stake in MG Motor India

SEP: Launches Windsor EV at an affordable price

Chaba says MG needs to keep expanding its footprint. "It also means that we introduce new models as we expand capacity. All that will follow. But the bigger picture of this JV is to have a long-term win-win relationship between the two shareholders. And we can be the leaders in green and sustainable solutions in India".

If MG's first leg of the India journey (2017-2023) was MG 1.0, Chaba prefers to call the upcoming leg of the journey (2026-2028) MG 3.0, by when the plan is expected to be fully executed. The blueprint also involves manufacturing cells and EV components in India, either in-house or through third parties. He says Sajjan Jindal brings keen focus on localising the EV ecosystem. "The entire focus currently is on NEVs, with EVs at the forefront. By 2027-28 nearly 85% of our sales is likely to be NEVs, which may go up to 100% by 2030," he says. Currently, EVs form 30-35% of MG's overall sales in India.

MG is adopting a dual-channel distribution strategy that proved to be a major success for PV market leader Maruti Suzuki. Apart from

"A lot of EV components are imported from China... it is important for the development of the EV market in India that we learn the tech and create an EV ecosystem here"

MANISH RAJ SINGHANIA
PRESIDENT, FADA

MG's mainstream channel, Chaba is planning to line up "accessible luxury cars" under a new MG Select channel. Together, these channels will have two new car launches every year. Further, to make EVs affordable, MG's game plan

involves offering vehicles through its BaaS (Battery as a Service) programme, which allows customers to purchase the recently launched Windsor at a lower upfront initial cost (excluding battery cost) and pay for the battery on a pay-per-use model.

FULL THROTTLE

After years of waiting, the Jindals want to grow aggressively. Parth Jindal, Sajjan Jindal's son and a member of the Steering Committee of JSW MG Motor India, is betting on the rapid rise in NEV sales over the next 10 years. The EV space in India is set to grow fast and he wants to have 33% market share by 2030. According to NITI Aayog, India's EV market will have a CAGR of 49% till 2030. The government expects the share of EVs to grow to 30% by the end of the decade from the current levels of 2-3%.

Over the next decade, Parth Jindal estimates, the size of the passenger cars market in India is expected to grow to 10 million units a year from some 4 million now. "By leveraging the legacy of
