

JSW MG MOTOR INDIA

Rising Up the Ranks

July 2024 Sales:
1,520 units

Models: ZS EV,
Comet EV, Windsor EV

JSW MG Motor India has been gaining momentum, achieving its best performance of the year with 1,520 units sold in July. Its market share is at 20%, up from 16% in July 2023. MG's competitive pricing and the success of the ZS EV and Comet EV models have cemented its position as a strong contender. With the newly-launched Windsor EV, MG Motor India's position in the EV race is one to watch out for.

TATA MOTORS

The Undisputed Leader

July 2024 Sales: 4,752 units

Models: Nexon.ev, Tigor.ev, Tiago.ev, Punch.ev, Curvv.ev

Tata Motors dominates the Indian EV market. Despite facing a 13% year-on-year (YoY) decline in sales, it has the largest slice of the pie. In July, it sold 4,752 EVs, securing a 63% share of the ePV market. However, increased competition has chipped away at its 70% market share from a year ago. The Nexon.ev remains the flagship, catering to both individuals and fleet operators with options like Xpres-T. The newly-launched Curvv.ev will also excite buyers.
