

LAY-OFFs AT OLA ELECTRIC

16 | BHAVISH AGGARWAL-LED Ola Electric laid off 5% of its workforce as part of an ongoing "structural transformation." The lay-offs are expected to affect 620 jobs as the electric vehicle maker had around 12,396 employees until last year. The lay-offs come as the EV maker has seen a consistent decline in market share over the past three months with retail sales staying below the 10,000 units mark for the third consecutive month in January.

DEEPTech START-UPs

DEEPTech START-UPs GET a boost as the Department for Promotion of Industry and Internal Trade (DPIIT) has broadened the definition for these, extending eligibility to companies up to 20 years old with annual turnover of up to ₹300 crore. Earlier, start-up status was limited to firms less than 10 years old. The revised framework aims to better support long-gestation, R&D, ensuring they are not penalised for extended development cycles. The move improves access to grants, growth capital and institutional funding.

FASTER RESOLUTIONS

THE GOVERNMENT IS likely to table the revised amendments to the Insolvency and Bankruptcy Code (IBC) when Parliament re-assembles after the recess of the Budget session. The recovery rate for IBC cases was at 31.63% in the third quarter of the fiscal with creditors taking a 68% haircut on admitted claims. Nearly 76% of the ongoing cases have been pending for over 270 days as of December 2025. The amendments will help in faster resolution of corporate insolvency cases and help the IBC become more of a game changer.
