

Dr. Vinod Anand: Building Trust at the Heart of India's Healthcare Logistics

From a modest entrepreneurial beginning to a nationally respected logistics institution, Dr. Vinod Anand's journey underscores how ethics, precision, and long-term vision can quietly shape an industry.

Dr. Vinod Anand

Managing Director of Akanksha Global Logistics Pvt. Ltd. (AGL)

Dr. Vinod Anand, Managing Director of Akanksha Global Logistics Pvt. Ltd. (AGL), represents a rare blend of scientific training, regulatory mastery, and disciplined entrepreneurship. Armed with a background in biology and early experience in a nationalised bank, Anand entered the logistics sector with an uncommon advantage—deep process orientation. In 1987, with just ₹80,000 in capital, he founded AGL at a time when customs clearance was manual, opaque, and arduous. As a licensed Custom House Agent since 1985, he built the company on a non-negotiable foundation of compliance and credibility. Today the company stands strong with an annual turnover

of Rs. 300 crores.

Over nearly four decades, AGL has evolved into a specialised leader in healthcare logistics, handling medical equipment imports and exports and trusted and respected by the healthcare industry. With a pan-India presence across Delhi-NCR, Mumbai, Gujarat, Kolkata, Bihar, Odisha, and Punjab, the company serves many marquee healthcare institutions including Medanta, Apollo Hospitals, BLK Hospital, Max Hospitals, Fortis and Dr Lal PathLabs—clients for whom precision and timeliness are mission-critical.

Certified with ISO 9001:2008 and backed by key industry accreditation,

AGL has transitioned from a transactional service provider into a strategic logistics partner, advising clients on regulatory pathways, digital customs processes, and risk mitigation.

Laying the foundation for highly affordable medical treatment of world class quality, Anand has a role to play in the 'current high' influx of medical tourism resulting in big contribution to the foreign exchange reserves of the country.

For Anand, logistics is a responsibility, not merely a business. By aligning operational excellence with ethical leadership, he has positioned AGL among the top players in its niche—demonstrating that in healthcare logistics, trust is the most valuable currency of all.

Dr. Jasjit S. Suri: Transforming Healthcare Designs via Artificial Intelligence

Dr. Suri's Preventive, Precision, and Personalized (P³ model) Framework is now any time-anywhere for Patient Diagnostics, Treatment, and Monitoring

Dr. Jasjit S. Suri stands at the forefront of artificial intelligence-driven healthcare innovation, redefining how medical diagnostics, treatment and monitoring are designed and delivered. As Chairman and CEO of AtheroPoint™, a California-based cardiovascular and stroke risk assessment company, he has introduced the Preventive, Precision and Personalized (P³) framework—an anytime-anywhere model that enables data-driven, patient-centric healthcare.

With over 25 years of industry experience in the United States, Dr. Suri brings together engineering excellence, deep R&D expertise and executive leadership. His career spans

influential roles at IBM, Siemens, Philips, Eigen and AtheroPoint™, where he has driven the translation of advanced AI and Generative AI into clinically validated solutions. He holds 50 U.S. patents and has been instrumental in securing regulatory clearances for medical technologies adopted across global healthcare systems.

A prolific researcher, Dr. Suri has published more than 400 papers in international journals indexed by the National Library of Medicine. With an H-index exceeding 100 and over

Dr. Suri
Chairman & CEO
AtheroPoint™

56,000 citations, he is widely recognised as the only CTO-entrepreneur worldwide to have achieved this milestone. He has also co-authored over 100 books on artificial intelligence and medical devices.

From a garage startup launched with an initial investment of ten paisa, Dr. Suri scaled AtheroPoint™ into a global enterprise delivering cardiology services

AtheroEdge™, across the USA,

India, Tanzania, Rwanda, Slovenia, and the Philippines. His R&D achievements have earned him Lifetime Achievement Awards in the USA and India, the Aatmanirbhar Face of Bharat Award, and Fellowships from leading professional bodies, reinforcing his stature as a visionary shaping the future of healthcare.
