↑ INTELLIGENT RABBIT

The Rabbit R1 is a standalone, pocketable AI companion. With a 2.88-inch touchscreen, this tiny device has a scroll wheel and a rotating camera you can use for visual search. The star of the show is Rabbit OS, based on a Generative AI “large action model”. One can press a push-to-talk button on the side to ask a question, launch services or play a song. Powered by a 2.3GHz MediaTek processor, the R1 has 4GB of RAM, and 128GB of storage, and its battery lasts through the day.

Available on: rabbit.tech

RABBIT R1
\$199; ships in the US from March

If you want a standalone, pocketable AI companion, this is a good bet

Artificial intelligence in consumer products is the flavour of the year. Here are some ways AI will affect daily tasks
