

PHARMACEUTICALS

Gujarat has been the flag bearer of India's pharma industry and a hub for pharmaceutical manufacturing and exports for years, employing about 50,000 persons in over 4,000 manufacturing units producing allopathic, homeopathic, ayurvedic and cosmetic drugs. Gujarat's pharmaceutical sector is also known for its innovation and has expanded its business horizons to include the production of generics, research and development (R&D), contract research and manufacturing organisations (CRAMS), bulk drug productions, and new chemical entities (NCE).
