CAGR in fee income; growth over FY22 in operating profit, alongside three-year CAGR in operating profit; and absolute increase in market share of deposits and CASA balances.

Size: There were three sub-parameters here, including size of total deposits, operating profit, and size of balance sheet as on March 31, 2023.

Strength: There were four overarching sub-parameters in this category, each with further sub-divisions as set out below:

Quality of assets: Increase

in gross non-performing assets (NPAs): Additions to gross NPAs during the year as a percentage of average net loans and advances (i.e. average of closing balance of FY22 and FY23); NPA coverage: provisioning as on March 31, 2023, for NPAs as percentage of gross NPA closing balance; net NPAs as ratio of net advances: gross NPA closing balance net of provisioning as on March 31, 2023, expressed as a percentage of net advances; gross NPA as a ratio of gross advances: gross NPA closing balance as on March 31, 2023, expressed as a percentage of gross advances; secured

net advances to total net advances: secured net advances to total net advances as on March 31, 2023; divergence in gross NPAs: difference between gross NPAs as per RBI rules and reported by the bank as a percentage of addition to NPAs; divergence in provisioning for NPAs: difference in provision for NPAs as per RBI rules and reported by the bank as a percentage of reported profit before provisions and contingencies; deposits of the 20 largest depositors as a share of total deposits, advances to the 20 largest borrowers as a percentage of total advances, exposure to the
