

cesses at scale and speed.

It is because of this impressive track record that Perfios was adjudged the Best Fintech in the Value Added Services category by the BT-KPMG jury.

“With our comprehensive tech stack of analytics SaaS products, we deliver around 8.2 billion data points to banks and financial institutions every year to facilitate faster decisions and process 1.7 billion transactions a year with an AUM of ₹3 lakh crore, significantly accelerating access to credit and financial services for the end customer,” says Sabyasachi Goswami, CEO of Perfios Software Solutions.

This confidence is built on steady financial performance. Its income has consistently increased

Since venturing into insurance, Perfios has introduced its Fraud, Waste, and Abuse solution, streamlining the labour-intensive fraud investigation process. Additionally, the company has broadened its offerings by entering the HR tech sector with One Vigil. It serves as a background verification and intelligence platform for candidate hiring and onboarding.

“We actively integrate AI into our product basket through offline training and real-time inference. This enables us to analyse vast amounts of data for fraud analytics and document categorisation,” explains Goswami.

It is now prioritising improvements in its use cases by utilising large language models (LLMs) to deliver cost-effective solutions.

an initial public offering (IPO) in the coming years. Goswami says the desire to go public is part of an organic evolution rather than a specific goal.

He says, “We continue to prioritise financial health and governance structures to meet the rigorous standards expected of public companies.”

Considering the appetite for digital solutions to streamline processes, analysts are upbeat. “Automating transactions and digitising processes have spurred rapid growth not only for Perfios but also for other companies operating in similar domains. This acceleration is crucial for advancing the BFSI sector,” says Kranthi Bathini, Equity Strategist at investment

WITH A SUITE OF MORE THAN 75 PRODUCTS AND SOLUTIONS, PERFIOS ADDRESSES THE CUSTOMER JOURNEY ACROSS BANKING, INSURANCE, AND EMBEDDED COMMERCE

over the last five years, rising from ₹43.6 crore in FY19 to ₹407 crore in FY23, or about 933% increase. It has grown dramatically over the last five years, reporting an Ebitda margin of 18% in FY23, as per data sourced by the company.

On the back of Perfios's strong data analytics and aggregation capabilities, some of India's biggest banks have launched same-day loan products and instant loan approvals.

“Almost 90% of financial institutions in India use Perfios to power their customer journey,” says Goswami.

Besides, the company is crafting products in domains like digital identity and background verification to attain flawless accuracy in verification procedures. Additionally, proactive measures are being taken to advance solutions capable of detecting and mitigating deepfake technology, particularly in applications like video KYC.

The firm is also looking to diversify its revenue streams by expanding product offerings and entering new markets.

In 2021, the company underwent significant leadership changes as it sought to position itself for

management firm WealthMills Securities.

These companies have benefitted from the growth that the Indian economy has witnessed, Bathini says.

“India's rapid economic growth has resulted in these companies generating substantial revenue, with Perfios being a notable player,” he says.

With the digitisation journey of companies reaching a peak, Perfios has reason to be optimistic about the future. **BT**
