

SSV Capital PLC- Building a Better Tomorrow

■ Ankur Ghosh

Ankur Ghosh Founder and CEO of SSV Capital PLC

SSV Capital PLC, headquartered in London's financial hub, Canary Wharf, holds a belief that creating wealth goes beyond mere profit generation for a singular entity. They advocate for an ethical approach, sustainability, and a positive impact on the future trajectory. This disruptive multi-class asset manager is committed to steering the course of progress towards a better direction.

Ankur Ghosh, Founder and CEO of SSV Capital, asserts that the creation of wealth encompasses both artistic intuition and scientific methodology. He emphasizes that foresight and understanding are essential for anticipating industry-defining trends, while expertise and experience are crucial for identifying feasible investment prospects.

SSV Capital's vision of positioning itself as a standard-setting ethical and sustainable investment firm revolves around constructing a portfolio of disruptive enterprises through thorough analysis, with a primary focus on people, planet, and prosperity. Central to their ethos is the pursuit of profits with a meaningful purpose.

The ethos at SSV Capital integrates meticulous analysis with technological advancements," emphasizes the CEO. "We recognize that effective asset management

demands rigorous risk assessment, careful long-term strategizing, and a nuanced comprehension of our clients' requirements.

SSV Capital adopts an analytical approach centered on three key sectors: Banking & Fintech, Real Estate & PropTech, and Funds.

In the realm of banking fintech, SSV Capital utilizes SSV Smartpay, a secure payment method harnessing open banking. Since its soft launch at the House of Commons in November 2023, this utility has garnered significant attention. This innovative payment solution employs a QR system to facilitate seamless and expedited transactions. Despite the apparent smoothness of the approach, SSV Capital remains vigilant about security, recognizing its paramount importance.

SSV Capital extends its assistance to real estate clients through SSV Real Estate, a digital investment platform tailored to fortify and broaden portfolios. Departing from conventional norms, SSV Real Estate steers clients clear of the limitations associated with traditional real estate opportunities. By providing investors the freedom to allocate funds according to their discretion, SSV Real Estate enables investments in high-yield commercial and retail properties.

When it comes to SSV Funds, the approach is tailored to address the distinct requirements of each funding endeavor. This entails managing portfolios in alignment with their specific goals, with a focus on identifying long-term potential to foster a secure financial future for investors. Notably, SSV Funds has established a £50 million fund under AIFM, Luxembourg. Highlighting the significance of Luxembourg as an alternative fund market, the CEO of SSV Capital emphasized that LPs show a preference for investing through funds based in Luxembourg.

Initially focused on the UK and now expanding to India, with plans for further expansion into Australia and the USA, SSV Capital has committed a substantial investment of 100-150 crore INR in both neobanking payment platforms and commercial properties in India. This strategic move aims to capitalize on the rising popularity of neobanks and their disruptive fintech services. By injecting capital into these innovative platforms, they aim to reshape the traditional banking landscape and promote financial inclusion. Additionally, their significant investment in commercial properties will diversify their portfolio and secure steady, long-term income streams. With this forward-thinking approach, SSV Capital positions itself at the forefront of the evolving financial and real estate markets, poised for sustained growth and prosperity.

SSV Capital's approach has successfully disrupted the fintech landscape. Speaking about the notable achievements of SSV Capital, Ghosh remarked, "SSV has been advancing on various fronts." Notably, the company is now listed on JP Jenkins and possesses an LEI & ISIN number on the London Stock Exchange. When questioned about the future direction of the multi-class asset manager, the CEO of SSV Capital expressed a commitment to persist in their chosen path until achieving success. Their overarching goal is to ensure the success of every endeavor related to Fintech, PropTech, and Fund. Motivated by recent accolades, including being named the Best Fintech (London) and Real Estate (London) Investment Firm of 2023, along with the distinction of Best Multi-Class Asset Management Company (London) of 2023 and recognition as a Visionary Leader in the Field of Financial Services by The Times Group of India in 2023, SSV Capital remains committed. Additionally, the title of Most Promising Sustainable Multi-Class Asset Management & Investment Firm at the Asia Business Conclave 2024 in Singapore, facilitated by Dr. Kiran Bedi, underscores their dedication. However, the company's focus extends beyond mere growth trajectory in the near future.
