If you want the latest in tech, this connected air purifier won't disappoint you

CONNECTED AND CLEAN

This air purifier from Philips combines cutting-edge technology with an impressive filtration system, featuring a HEPA-13 filter to trap even ultra-fine particles. Designed with a smart sensor that detects air quality in real-time, it automatically adjusts its fan speed for optimal purification. Compatible with the Philips Clean Home+ app, it offers remote monitoring and control, allowing users to manage air quality from anywhere. Just think: you can monitor the air quality at home before leaving office, switch on the air purifier while leaving office, and breathe the cleanest air when you get home. Plus it also displays AQI in real time! This model is perfect for tech-savvy homeowners who want a seamless blend of convenience and performance in their air purifying solutions.

Minimalist All-in-One

This air purifier leverages Plasmacluster ion technology, a signature of the Japanese brand, to neutralise not only dust and allergens, but also bacteria and viruses in the air. This model is compact yet powerful, suitable for bedrooms and small living spaces where quality sleep and clean air are priorities. Equipped with a dual-action HEPA filter, it removes 99.97% of microscopic pollutants, ensuring you breathe only the purest air at home. With an understated minimalist design and quiet operation, this air purifier checks most of the boxes and is a solid contender for those who are seeking to breathe much cleaner air indoors.
