As India strides toward its vision of Viksit Bharat 2047 and aims to become a USD 30 trillion economy with a per-capita income of USD 18,000-20,000 by the year 2047, manufacturing emerges as a pivotal force. Ranked as the world's third most sought-after manufacturing destination, India holds the potential to achieve \$1 trillion in exports by 2030. However, realizing these ambitious goals necessitates streamlining operations, boosting efficiencies, and fostering sustainable practices to meet the surging demands of a dynamic global market. To ensure smooth operation of machinery, fewer breakdowns, and greater longevity of machines, lubrication plays a key role. As machinery evolves, becoming more sophisticated and operating in ever-harsher environments, the demand for specialized, high-performance lubricants grows. Effective lubrication reduces wear, minimizes downtime, and

optimizes energy consumption, allowing industries to achieve peak performance and sustainability.

Driving Productivity and Progress with Mobil™
