

CONCOR Sets New Milestone with North India's First In-House LNG Terminal at MMLP Khatuwas, Rajasthan

On November 14, 2024, Shri Ravinder Goyal, Member of Operations & Business Development at the Railway Board, Government of India, inaugurated a cutting-edge LNG station and flagged off the first LNG-powered road trailer with a container at CONCOR's Multimodal Logistics Park (MMLP) in Khatuwas, Rajasthan, located along the Western DFC. The event was attended by Shri Sanjay Swarup, CMD/CONCOR, and senior officials from both Indian Railways and CONCOR.

To foster eco-friendly logistics solutions nationwide, CONCOR has established an in-house LNG station at MMLP Khatuwas, in collaboration with IOCL, to ensure an uninterrupted supply of LNG. This facility will primarily support First and Last Mile (FMLM) services for customers utilizing CONCOR's LNG-powered road trailers. It is the first such facility at any MMLP in North India.

LNG is a cleaner, quieter alternative to diesel, with an emission factor 25% lower. Depending on the duty cycle, it can reduce carbon dioxide (CO₂) emissions by up to 28%, completely eliminate sulphur oxide (SOX) emissions, cut nitrogen oxide (NOX) emissions by as much as 59%, decrease particulate matter (PPM) by up to 91%, and lower noise levels by up to 30% compared to diesel trucks.

During the event, Shri Ravinder Goyal commended CONCOR for its commitment to sustainable logistics. He emphasized that LNG is a more efficient and environmentally friendly alternative to diesel and highlighted that such green initiatives are essential to driving an eco-conscious logistics industry. "Every step towards sustainability in logistics is a significant and positive move," he remarked.

Shri Sanjay Swarup stated, 'To provide a total logistics solution to our customers, CONCOR is committed to offering First Mile Last Mile (FMLM) connectivity'.

In alignment with ESG principles, CONCOR has adopted LNG-powered trucks to provide green, sustainable First and Last Mile (FMLM) logistics solutions. To support these services in North India, CONCOR has set up its own LNG pump, a first-of-its-kind facility in the region.

CONCOR's pioneering initiative marks a significant step towards green logistics in Northern India and demonstrates CONCOR's commitment to fulfilling ESG norms by reducing carbon emissions and promoting eco-friendly transportation solutions.
