

Chennai 1 Data Center

The AdaniConneX Chennai 1 Data Center is strategically located in the SIPCOT IT Park within Chennai's IT corridor, a hub for some of India's largest technology enterprises. With a capacity of 33 MW, this network-neutral facility has been powered by renewable energy since its inception, ensuring a premium customer experience.

Accolades, Awards & Advantages

Chennai 1 has garnered significant accolades, such as the Digital Infrastructure Project of the Year Award at the Tech Capital Global Awards 2023 and the Digital Technology Inside Data Center Award 2023 by W.Media Cloud and Data Center Convention for implementing EdgeOS. This facility boasts numerous advantages, including achieving 99.999% availability, utilising the award-winning EdgeOS for enhanced observability, ensuring robustness with redundant power and network connectivity, and providing renewable energy solutions. Furthermore, Chennai 1 offers scalable colocation solutions to support growth, customisable options like Dedicated Cage, Private Suites, or Colocation, and flexible designs that support rack power densities from 6 kW to over 50 kW, thereby enhancing AI, GPU, and Cloud workloads.

The EdgeOS platform, its patented and award-winning data center operating system, surpasses the traditional Data Center Information Manager (DCIM) platform by enabling clients to manage, monitor, and control their global data center assets, operations, and footprint from a single pane of glass anywhere, 24/7. Demonstrating

operational excellence, AdaniConneX leverages EdgeConneX's expertise and history of delivering 99.999% availability across geographies to set new standards in the Indian market.

The Chennai 1 facility achieved an impressive 100% availability by implementing robust processes, prioritising staff training, and utilising EdgeOS technology. Additionally, by leveraging the Indian Energy Exchange (IEX) for energy procurement, the Chennai 1 facility optimises costs through strategic trading, further enhancing operational efficiency.

Case study – Resilience in Action

A case study in resilience, Chennai 1 demonstrated its robustness when Cyclone Michaung struck Chennai in December 2023, delivering zero downtime and showcasing its unwavering commitment to operational excellence, effective design, and proactive planning. As part of the monsoon preparedness plan, the team carried out all preventive maintenance for all critical equipment and conducted specialised training for emergency response. "We were successful because of design expertise, business continuity planning, operational excellence and most importantly our culture. Through our state-of-the-art data center, we are committed to the growth of Chennai. Our mission is to help customers scale their digital infrastructure with confidence," said AdaniConneX spokesperson.

Talent & Innovation

Diverse perspectives are crucial in driving innovation

within this industry. AdaniConneX's 40-30-30 programme exemplifies its commitment to inclusivity and excellence, fostering a blend of expertise and fresh ideas. It draws 40% of its talent from seasoned professionals within the industry, ensuring a solid knowledge base. An additional 30% comes from ancillary industries, bringing diverse approaches, while the final 30% consists of fresh talent mentored into future leaders. This strategic hiring approach not only enriches its teams but also prepares them to meet and exceed the challenges of the digital landscape.

At AdaniConneX, the Global Training Programme with EdgeConneX is pivotal, providing hands-on training and exposure to global standards in design, engineering, and operations. This initiative accelerates learning and equips our talent with skills to meet global data center benchmarks. Leveraging EdgeConneX's decade-long expertise, the workforce is rapidly trained, ensuring innovative leadership. By immersing employees in EdgeConneX facilities abroad, we gain invaluable industry insights. Nearly 50% of the staff have completed this programme, significantly contributing to success and preparing AdaniConneX to excel in the ever-evolving digital landscape.

AdaniConneX fosters innovation and growth by nurturing future IT leaders and raising industry awareness through university partnerships. By collaborating with local universities, it offers educational tours of the Chennai 1 facility, giving students valuable insights into data center operations and opening potential career opportunities in industry.
