

enthused by the consistent returns of more than 12% that they've seen since 2019, barring 2022, when tech stocks saw a decline. This may be tempered now with the correction in the market. Other contributing factors include India's inclusion in the global bond indices.

"Overall, in the last year, the primary market has performed very well with more than 70 companies listed, out of which 45 listed at a premium of 48% average (12% to 175%), while the remaining 25 companies had a poor listing in the range of 10-20% on listing day," says Vikas Jain, Head of Research at Reliance Securities.

However, there have been some signs of challenges since then. The market turned bearish in November as it went into a technical correction—a situation when the benchmark indices decline by 10% each. Besides, there were some concerning trends even in the two big IPOs of Hyundai and Swiggy.

In both cases, there was no major retail investor enthusiasm. For instance, though the Hyundai IPO saw 3.59 times (x) subscription, that was largely down to last-min-

THE IPO BOOM

➤ Of the nearly 70 companies listed in the past year, 45 listed at an average premium of 48% ➤ In all, a cumulative ₹1.34 lakh crore was raised, making it among the highest for a year
