# THE NUTS & BOLTS

The BT500 ranking is based on a master sample of around 4,800 listed firms

BY RAHUL OBEROI • ILLUSTRATION BY RAJ VERMA

**THE COUNTRY'S MOST** valued companies have been ranked based on market capitalisation by *Business Today* every year since 1992. Like previous years, this year's rankings are based on their average market capitalisation for the 12-month period from October 1, 2023, to September 30, 2024.

We began with a master sample of around 4,800 listed firms. We used the BSE market capitalisation for all cases, except firms that are listed only on the NSE. Some 319 companies that were not traded on at least 20% of the 248 total trading days in the October 2023–September 2024 period were excluded from the list. Thereafter, we extracted the average (daily) market

capitalisation of each company over the period under consideration and used it to rank the Top 1,000 companies.

For a deeper perspective, we have also provided the average market capitalisation over the past two fiscals (FY24 and FY23), return on net worth (RONW) and return on capital employed (ROCE), in the tables. We have also ranked companies by assets, profit after tax (PAT), total income and debt.

Firms in the banking, financial services and insurance (BFSI) sectors have not been ranked on these parameters as their method of capturing and measuring these metrics is markedly different. For most firms, the fiscal ends on March 31.

The exceptions have been mentioned in the footnotes below the tables. All data has been sourced from corporate database ACE Equity, as on October 4, 2024.

A few companies have changed their names during the period of study. For instance, Century Textiles is now known as Aditya Birla Real Estate, Indiabulls Housing Finance is now Sammaan Capital, and DB Realty is now called Valor Estate, among others. The Top 3 players including oil-to-telecom behemoth Reliance Industries, IT major TCS and private sector lender HDFC Bank retained their positions on the list. **BT**
