

marquee international orders for manufacturing a variety of vessels. We see sustained visibility for revenue growth and margins,” Ambani adds.

CSL's order book stood at ₹22,587 crore as of June 30, 2024, including ₹21,587 crore in shipbuilding and ₹1,000 crore worth of contracts in ship repair.

Ravi Singh, Senior Vice President-Retail Research at Religare Broking, points out that CSL's diversification into repairs gave it a fillip. “Its diversification into repairs and inland waterways has helped it see a revenue uptrend. The trends look promising, with ongoing government initiatives, capacity expansion, and global demand for shipbuilding,” he says.

Suzlon Energy, led by CMD Vinod Tanti, is the next highest gainer on the list. Over the study period, the company saw a 320% jump in its one-year average m-cap, rising to ₹66,316 crore from ₹15,787 crore in the previous year. The company, with a 32% market share in India's wind turbine sector and a fully integrated operational model, has returned to a net cash position as of FY24, for the first time since FY06. The consolidated debt-to-equity ratio of Suzlon stood at 0.03 times for the fiscal ended March 2024, against 1.73 times a year ago.

According to a report from Ventura Securities, the company has successfully turned around after years of financial distress, supported by asset sales, debt restructuring, and favourable industry

“Increased orders from the government, growing defence sector, and a focus on indigenous shipbuilding have helped Cochin Shipyard”

tailwinds. Kranthi Bathini, Equity Strategist at Wealth Mills Securities, says that Suzlon has benefited from the growing demand for renewable energy the world over. “Renewable energy has been the flavour of the market across the globe. Therefore, sectoral tailwind has helped Suzlon Energy to outperform in the last one year,” he says.

Railways-related firms, including Indian Railway Finance Corporation, Rail Vikas Nigam and Jupi-

ter Wagons also witnessed around 302%, 250% and 226% increase, respectively, in their average-market capitalisation.

YES Securities' Ambani adds that the outperformance of railway-related counters was clearly the offshoot of the governmental commitment and thrust to improve railway infrastructure and modernise the rail network, as is evident from the Budget allocation boost.
