“RIL’s growth has plateaued due to fluctuating oil prices. This has led it to explore new avenues with broader growth potential”

APURVA SHETH

HEAD OF MARKET PERSPECTIVES & RESEARCH, SAMCO SECURITIES

“RIL has utilised the free cash flows from its traditional businesses of oil and chemicals to build world-class companies in retail and telecom/tech”

GAURAV DUA

SVP, HEAD CAPITAL MARKET STRATEGY, SHAREKHAN BY BNP PARIBAS

has announced a \$10-billion investment in a manufacturing ecosystem and aims to produce green hydrogen at \$1 a kg against the average of \$4 a kg. “RIL will be a tremendous energy provider as the world takes those big steps in renewable energy.” The expectation is that, by 2030, many of these projects will be a lot more viable. “It is moving towards becoming a necessity and with the scale of projects like data centres, RIL’s businesses become a base for captive consumption and a sound understanding of technology will make a difference.”

Success with telecom has helped in using tech effectively in areas such as retail and laying the foundation for new energy.

Company trackers outline three big opportunities—higher infrastructure spending, higher discretionary spending, and a growing base of consumers. “RIL is well-placed with its understanding of energy-intensive areas, materials, and the ability to serve a large consumer base,” one such observer says.

Getting the formula right on the telecom vertical built Reliance’s prowess on technology. That could build the company’s competencies in renewables, even though it is a different business.

AI and the work done across RIL’s businesses have improved predictability outcomes. Using green energy in some projects has already seen costs far lower than fossil fuels. “With AI in refining, petrochemicals, and renewable, for instance, one can derive insights to ensure overall operations are far more predictable,” said the observer.

The future path is clear: RIL will focus most of its time and attention on newer technologies. The new RIL is right here. **BT**
