

Innovative, Hands-On, Industry-Aligned: The Revamped Great Lakes MBA is Here to Set Graduates Apart

Great Lakes Institute of Management, a pioneer in the Indian MBA landscape, is once again setting new benchmarks with its revamped curriculum. Under the leadership of Dean Suresh Ramanathan, the institution has introduced a forward-thinking program designed to meet the evolving demands of today's business environment. With a 20-year legacy of innovation, Great Lakes, Chennai is positioning itself as a leader in producing job-ready graduates who can excel in a rapidly changing corporate world.

The newly overhauled one-year MBA is driven by comprehensive research, feedback from recruiters, and insights from industry veterans. This revamped program emphasizes practical, hands-on learning, moving beyond theoretical coursework to ensure students are equipped to "hit the ground running" in roles such as consulting, data analytics, product management, and more.

Key Differentiators in the New Curriculum

Role-Based Concentrations: Great Lakes has redefined its specializations by introducing seven new concentrations, each tailored to specific job roles. Students can now choose from paths like Product and Project Management, Data Science, Finance and Fintech, and Consulting. This approach combines specialized knowledge with the practical skills that recruiters demand.

Lab-Based Learning: In response to industry

feedback, Great Lakes has integrated Lab Courses into the curriculum. These labs emphasize experiential learning—everything from data storytelling to problem-solving within an "Innovation Sandbox," a concept inspired by top global B-schools like Stanford. Companies like PayPal are collaborating on these labs, ensuring that students get a taste of real-world challenges and solutions.

Hands-On Experience and Industry

Partnerships: The curriculum isn't just about classroom learning. Partnerships with companies like PayPal are a testament to Great Lakes' commitment to industry relevance. These collaborations guide the creation of lab courses, making students ready to tackle challenges right from day one in the corporate sector.

Structured Mentorship: Each student is paired with a faculty mentor, offering guidance on academic

progress, career goals, and skills development. This one-on-one mentoring ensures personalized attention, empowering students to navigate their academic journey with confidence.

A First-Mover in Business Education

From its inception, Great Lakes has been at the forefront of business education in India. The revamped curriculum is a testament to the institution's ethos of continuous innovation. With this bold, forward-looking approach, Great Lakes is not only preparing students for today's challenges but is also equipping them to become tomorrow's leaders.

For organizations seeking job-ready graduates who are adept at both strategic and practical problem-solving, the revamped Great Lakes MBA offers a talent pool like no other—a true testament to its pioneering spirit in business education.
