

Sabyasachi Goswami
CEO, Perfios

What is Perfios' core business model?

Perfios is a global B2B SaaS product company serving the Banking, Financial Services and Insurance industry in 18 countries, empowering 1000+ Financial Institutions. Through our category-creating platforms and products, we help financial institutions take big leaps by shaping their end-to-end customer lifecycle from origination, onboarding, decisioning, and underwriting to monitoring processes at scale and speed. With our comprehensive tech stack of SaaS products, we deliver billions of data points to Banks and Financial Institutions every year to facilitate faster decisioning, significantly accelerating access to credit and financial services for the end customer. Our journey so far has helped us build products and solutions for scale, which are industry and geography agnostic. The broader applicability of our technology has enabled us to expand to adjacent domains like E-commerce, payments, securities and investments, legal, HRtech etc.

How does Perfios's product suite cater to the diverse needs of financial institutions across BFSI?

Perfios has a comprehensive product suite of 75+ products and solutions that solve the entire end-to-

end customer journey across banking, insurance, and embedded commerce. Each of our products are developed to solve specific tough problems across our business customers, keeping in mind accuracy, speed, and trust, across key stages of the customer journey:

Sourcing and Onboarding

The journey begins with helping our customer generate significantly higher numbers of verified, qualified and relevant business leads. This is followed by seamless customer onboarding where specialized modules simplify this critical step for both retail and corporate customers. With advanced capabilities like document analysis, identity verification, and liveness checks, We aim for a balance between convenience and fraud protection. Our advanced algorithms start operating in the background even before the first key stroke is input by the customer, weeding out potential frauds at the application stage itself.

Decisioning and Risk Assessment

Once customers are onboarded, our AI-powered decision analytics tools come into play. These solutions support key processes such as underwriting, credit evaluation, and health claims processing.

By using alternative data and advanced machine learning for smarter, faster decision-making, we serve as a comprehensive KYC solution, supporting all modes and types of identity verifications, seamlessly integrated with fraud protection mechanisms to ensure secure and reliable processes.

Our commitment goes beyond just KYC, Perfios offers highly customizable, pre-integrated, and ready-to-use onboarding flows. Additionally, we provide full-fledged systems like Loan Origination Systems (LOS) and Business Rules Engines (BRE) to empower our customers with end-to-end solutions tailored to their needs.

Fraud Prevention and Compliance

Perfios addresses fraud and compliance challenges across industries with advanced fraud detection systems that uncover tampered documents, mule account detection, and suspicious activities such as money laundering over the entire customer lifecycle. Our compliance check solutions go beyond BFSI to ensure regulatory adherence and enable seamless, consent-driven data flows across diverse sectors, safeguarding businesses and their customers.

Customer Engagement and Monitoring
