

Transforming India's BFSIs with Robust Digital CCM Platform

Carrying forward a legacy that dates back to 1959, Mr Amit Sawhney, heads India's leading Customer Communications Management (CCM) solutions provider as CEO, FCI CCM, headquartered in Noida, India. Gifted with sharp business acumen, strategic skills, and taking calculated risks, Mr Sawhney, believes in the philosophy of continuous change and to adapt with evolving times. This winning combination helped him build a business from a photocopy shop to one of the largest transaction print and mail provider to now an innovative CCM and digital data products company.

Amit Sawhney
CEO, FCI-CCM

What prompted you to go into the business of digital Customer Communications Management ?

Traditionally, we were completely into print and it was a question of survival for us because print was declining. I noticed the writing on the wall and upgraded our business offering with the demands of time. We were agile to leverage this change transitioning from a copy shop to transactional print and now a tech business. The new age digital business required a completely new skill set, but we sustained with the support of a smart and dedicated team. Post Covid, is when we really started putting our energies around technology growing from a humble team of 5-7 people to a strength of 250, in the last four years. Today, FCI, is India's leading omnichannel CCM solutions provider majorly to BFSIs i.e., Banking, Insurance, and Financial Services, besides some utility and healthcare services.

How is CCM proving to be an asset to your clients?

To put in lay man's words, the transaction updates, payments reminder messages that come to you on your mobile, or when you open the mobile app to get documents like bank or credit card statements or tax certificates and so on, this flow of communications between the institution and the consumer is facilitated by FCI's digital CCM platform. Earlier, companies developed their own tools in-house, which were inadequate to cater to all communications spanning
